MODERN MAGIC

The busy homeowner was building a home with the intention of creating a place to relax, unwind, and entertain family and friends. He approached Michelle to design the proposed kitchen plan in a way that ensured the space was not blocked off from the adjoining areas.

This project's priority was to create an open, inviting kitchen zone that embraced the main living areas and outdoor entertaining spots. The impressive kitchen is perfect for both displaying culinary prowess and preparing simple meals. Family and guests have ample room to share in the cooking and food preparation, and can gather and relax in the adjoining indoor and outdoor spaces.

Though the room was designed with the homeowner's current lifestyle in mind, several family-sized features such as a separate preparation zone and a second sink were integrated to suit his plans for the future.

The open-plan design boasts a distinct coastal vibe, with a selection of low-maintenance and cost-effective materials and finishes that ensure practical durability. The bulkhead and continuous shelf embraces the bold colour palette, which has been softened with the natural Tasmanian oak highlights and the custom-built Tasmanian oak dining table. This kitchen simply completes the gorgeous home.
